### COVER COLLECTION:

5 each of 5 New Bouquet Tulips: 25 Bulbs for \$4.35

We like BOUQUET TULIPS because of the outstanding effect they give in beds or borders. Each bulb produces a "bouquet of 3-5 or more big blooms 2 1/4" or more in length and breadth, so that even when planted in a single row, they will furnish enough flowers for a really effective showing. When cut, a single plant provides an arrangement. They're fashionable too, for even the older varieties are still so new, they are not generally offered.

**THE GREEN TULIP** (*Viridiflora praecox*) Wavy petals of emerald green shading through lemon yellow to cream at petals edge. The petals are pointed and curled, for very graceful effect. Good strong stems hold the medium sized flowers. Very rare and most attractive. 45c ea.; 3 for \$1.15; 10 for \$3.00.

## TO CONTROL "DAMPING OFF"

"Damping Off" is a microscopic fungus growth which attacks the baby plants just as they emerge from the ground or while they are still small, and is the reason for many failures which are blamed on the seed, especially where very small seeds are concerned. It may be overcome by treating the seed (We do this for you as an extra "Park Service"), and sterilizing the soil. (Bake in the oven 2 hrs. at 200° 24 hrs. before planting.) Sphagnum moss is a sterile antibiotic material in which fungi and bacteria cannot live. We have found sowing seed in Sphagnum sifted on sterile soil a positive Damp-off control. Where sterilizing is impractical, as with an outdoor bed or cold frame, spray the soil, just as the seedlings appear, with Semesan solution (½ oz. to gallon of water). We offer SEMESAN in ¼ lb. pkg. \$2.50. This is enough to spray 480 sq. ft.

Horticultural Milled Sphagnum ready to use Home Garden Package with directions. \$1.00.

# SPECIAL PERENNIAL FLOWER SEEDS

## that Benefit from Fall Sowing

These are valuable subjects of the flower garden, as most of them are not only showy and beautiful when in bloom, but will do service year after year for a long period, enduring cold, excessive rain and drought, regardless of neglect and improper attention.

Directions for making outdoor beds and sowing seeds are sent with every order.

**Hp. HARDY PERENNIALS** are hardy plants which will live and bloom every year for a long period. Plants grow to the flowering stage each year and die down again to the roots which remain alive but dormant until the next season. They are very valuable for borders and cut flowers, and once established require less care than the annuals.

**Hb—HARDY BIENNIALS** are those which bloom the second year from seed, then die. For a continuous display of this type, seed must be sown every year.

### SPHAGNUM MOSS

#### Replaces Soil for Pot Plants

Because it eliminates many problems, and the plants seem to grow better with less attention, we have replaced the soil in our greenhouse benches and all of our pot plants with Sphagnum Moss. It provides perfect drainage, proper aeration, easy moisture control, and keeps disease at a minimum. Because it is sterile, perfect fertility control is assured merely by watering with a weak solution of Hyponex. Cuttings may be rooted in the pot in which they are to grow, no transplanting necessary. We have prepared directions telling how we use Sphagnum Moss as a soil substitute and will send it with each order for the moss. Try it, and see how much easier your gardening will be.

# Park's FLOWER BOOK for Autumn 1959

**MAGNIFICENT DAFFODILS, SUPERB TULIPS  
OUTSTANDING LILIES  
MANY VARIETIES, YOU'LL FIND ONLY HERE**

**BINKIE. The first reverse bi-color.**

A rare new color break—The first reverse bi-color. So unusual and lovely, that its memory becomes a haunting melody. The perianth is a pronounced lemon yellow. The flaring cup, a pale lemon, bleaching almost pure ivory with tiny rim of yellow and ivory halo at perianth base. 75c each; 3 for \$2.00; 10 for \$6.00.

**"Weatherproof" Large Cupped Daffodil APRICOT ATTRACTION**

Printer's Ink cannot capture the enchantment of this unique color. Light apricot perianth, shading to creamy apricot at petal tips, is of a symmetry seldom found in nature. 4" across, it is centered by a ruffled cup of fascinating deep, luminous apricot. The color is best if grown in light shade. Here is grace and beauty beyond compare. Special: 85c each; 3 for \$2.35; 5 for \$3.75; 10 for \$6.50.

**FRA ANGELICO Outstanding Large Cup Daffodil**

Colorful, long lasting and unusual, it was a favorite in our trial garden. The slight flare of the perianth gives it a "jaunty air" and serves to accentuate the size and shape of the wide flung, ruffled cup. Vigorous, deep green foliage, plenty of bloom and sturdy 14" stems make Fra Angelico a good garden plant. 3 for \$1.10 for \$3.00.
